BRD - Manage Events - UI Changes

Client Name: Chick-fil-A
Enhancement: INF-10774

Document History
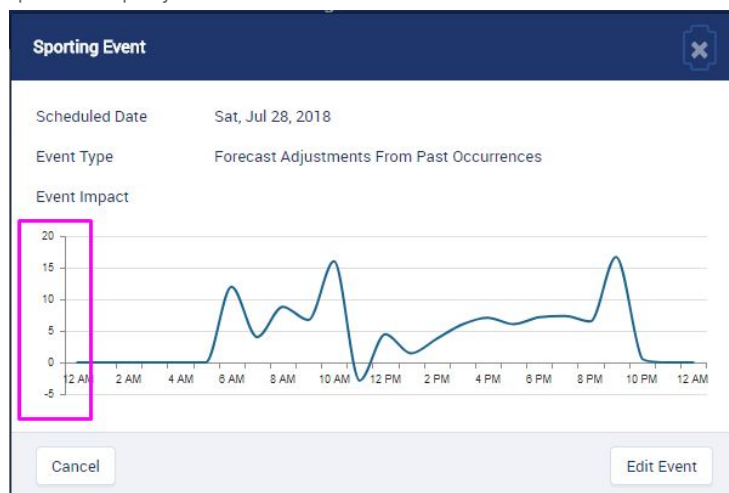

| Version	Date	Author	Change Description:
1.0	7/27/2018	Will Englefield	First Draft

1. Business Challenge or Problem

Further to a review (7/18/2018) of the first iteration of Manage Events, delivered in 2018R3, there were a number of UI enhancements requested. See the Feature Description and Overview section (below) for more details.

2. Feature Description and Overview

1. Event Impact Graph y axis not labeled:

a.

b.

c. Is it possible to add the label to indicate that this is percentage?

2. Calendar Day View

a. A change was made to start the day view at 5am

b. Is it possible to start the day at the start time of the first event, if it is earlier than 5am, else
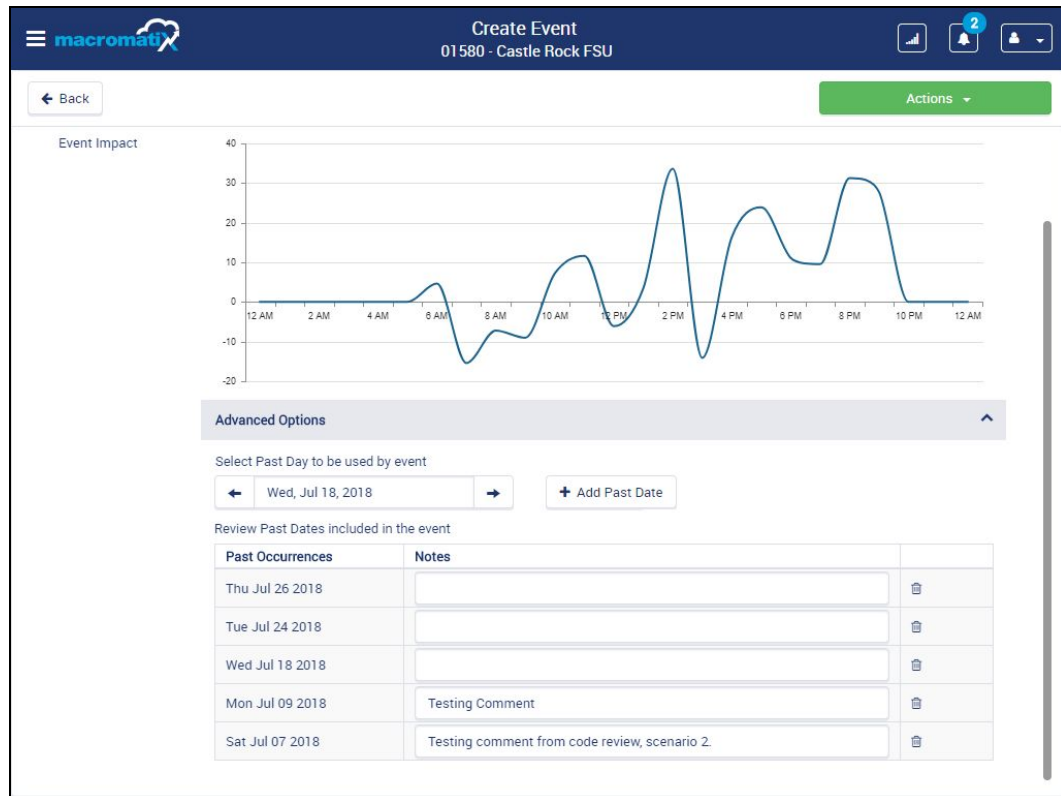

start at 5am?

    c.   The concern is that if for some reason the store were to configure an Event for the Late Night period (00:00 - 05:00), that event would not be displayed

3.   Auto Events

    a.   Concern was raised about the usability and user understanding of these events

   b.   Accordion the day/date selection into an Advanced Options section that is collapsed by default:

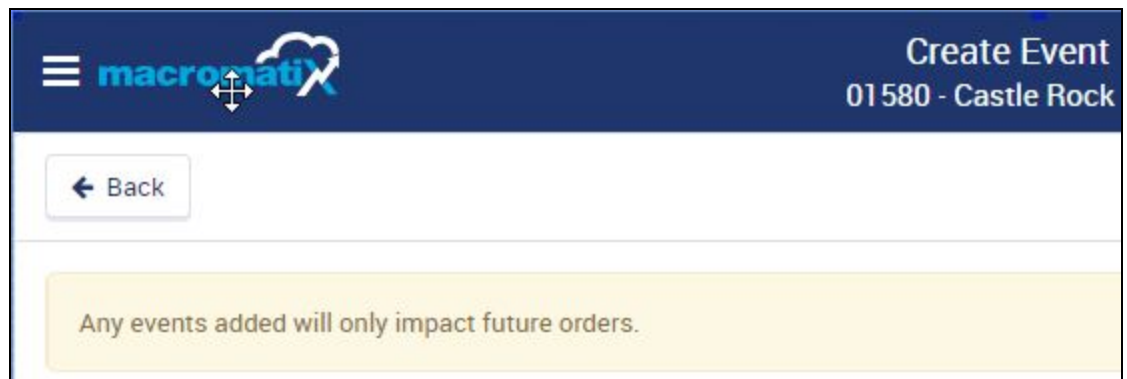

c.

d.

e.   Selection of past dates

    i. Prevent the selection of Sundays

    ii. Prevent the selection of days that are more than 120 days in the past

  f. Advanced Options - Labels

    i. Add label to section for selecting a past date

    ii. Add label to section displaying past dates that are included in the event

4. Manage Adjustments

 a. Include the scheduled date alongside the event name in the header

  b.

5. Manage Events Calendar - Enhance Toast Confirmation

  a. Update the confirmation message displayed in the green toast to include:

    i. The event name

    ii. The scheduled date of the event

  b.

6. Create Event - Default message

  a. When adding a new event, display a banner (toast) message across the top of the page

  b.

7. Edit Event - Default message

  a. When editing a new event, display a banner (toast) message across the top of the page

b.

8.

3. User Acceptance Criteria

1. Confirm that the changes documented are made as expected

4. Notes

1. Messages will be available for localization
