InFORM Request Document
INF - 11766- Delivery Schedule Entered in InFORM and defaulted to Order

Client Name: Chick-fil-A

Document History

Jira # & Title	INF - 11766- Delivery Schedule Entered in InFORM and defaulted to Order		
Req Release	2019R4		
Version	Date	Author	Change Description:
1.0	6/10/2019	Sandy Sweeney	First Draft
	6/12/2019	Will Englefield	Reviewed

1. Business Challenge or Problem

Schedule Delivery does not auto populate for the order date and cover until date. By populating these fields the user will not have to determine the order date or the cover until date.

2. Feature Description and User Stories

At the store level, the vendor order date, delivery date and cover until date will be maintained so that when the user creates and order for that vendor all calculated dates will be auto populated. By populating these fields the user will not have to determine the delivery date or the cover until date at the time of creating an order.

Example of vendor date information

Order Day	Delivery Day	Cover Until Day
Tuesday	Thursday 08:00	Saturday 08:00
Thursday	Saturday 08:00	Tuesday 06:00
Friday	Tuesday 06:00	Thursday 08:00

User Story:
- As a user I want to create a delivery schedule for vendors associated to my restaurant so that when I create an order the schedule can be used

Acceptance Criteria:
The user can create a schedule for vendors assigned to the logged in restaurant.
The user can edit a schedule for vendors assigned to the logged in restaurant
The user can delete a schedule for vendors assigned to the logged in restaurant

User Story:
- As a user creating an order for a specific vendor I want the Delivery and Cover Until Date Times to be populated after I have selected a specific vendor that has a delivery schedule configured.

Acceptance Criteria:
When the distributor is selected, the date and time for the next delivery is populated as well as the cover until date and time based on the configured schedule..

User Story:
- As a user creating an order on a non-order day, after selecting the distributor and delivery date I want the Delivery Time and Cover Until Date Times to be populated based on the order schedule that I have defined.

Acceptance Criteria:
When the delivery date is selected the delivery time will change, and the cover until date and time will be updated based on the configured schedule.

User Story:
- As a user creating an order for a specific vendor I want the ability to configure a schedule that supports multiple deliveries on the same day.

Acceptance Criteria:
If a schedule is created with multiple deliveries for the same day, the system should properly accommodate this configuration when placing an order by leaving the delivery and cover until dates blank, but indicating that this is a multiple order.

3. Assumptions or Constraints

1. The schedule will be populated by a store level user.

4. Notes

Mockup:
